Company/Organisation Name: Bandhu

Name of the Technology: Bandhu

Country: India

Link to your official website: https://www.bandhu.work

Project Description:
Bandhu is an AI-driven tech platform that connects India's blue-collar workers to jobs and affordable housing. It securitizes workers' rental housing cash flows to unlock rental deposit loans and home improvement loans for low-income tenants and landlords, ultimately making the rural-to-urban migration process more equitable for 300 million Indians.
